

Bicycle Parkway Grid Concept

A grid of bicycle parkways every two miles connecting most town centers and to routes outside of the urban area.

Total miles of bicycle parkway	281
miles of off-street paths	121
miles of bike boulevards	26
miles of cycletrack	134

Regional Bicycle Parkways are the highest functional class for bicycle facilities and form the spine of the regional bicycle network. They can be a variety of facility types, such as trails, separated on-street bike-ways or bicycle boulevards and are designed to provide a higher degree of capacity and comfort/protection from motorized traffic compared to an average bicycle lane, trail or boulevard.
