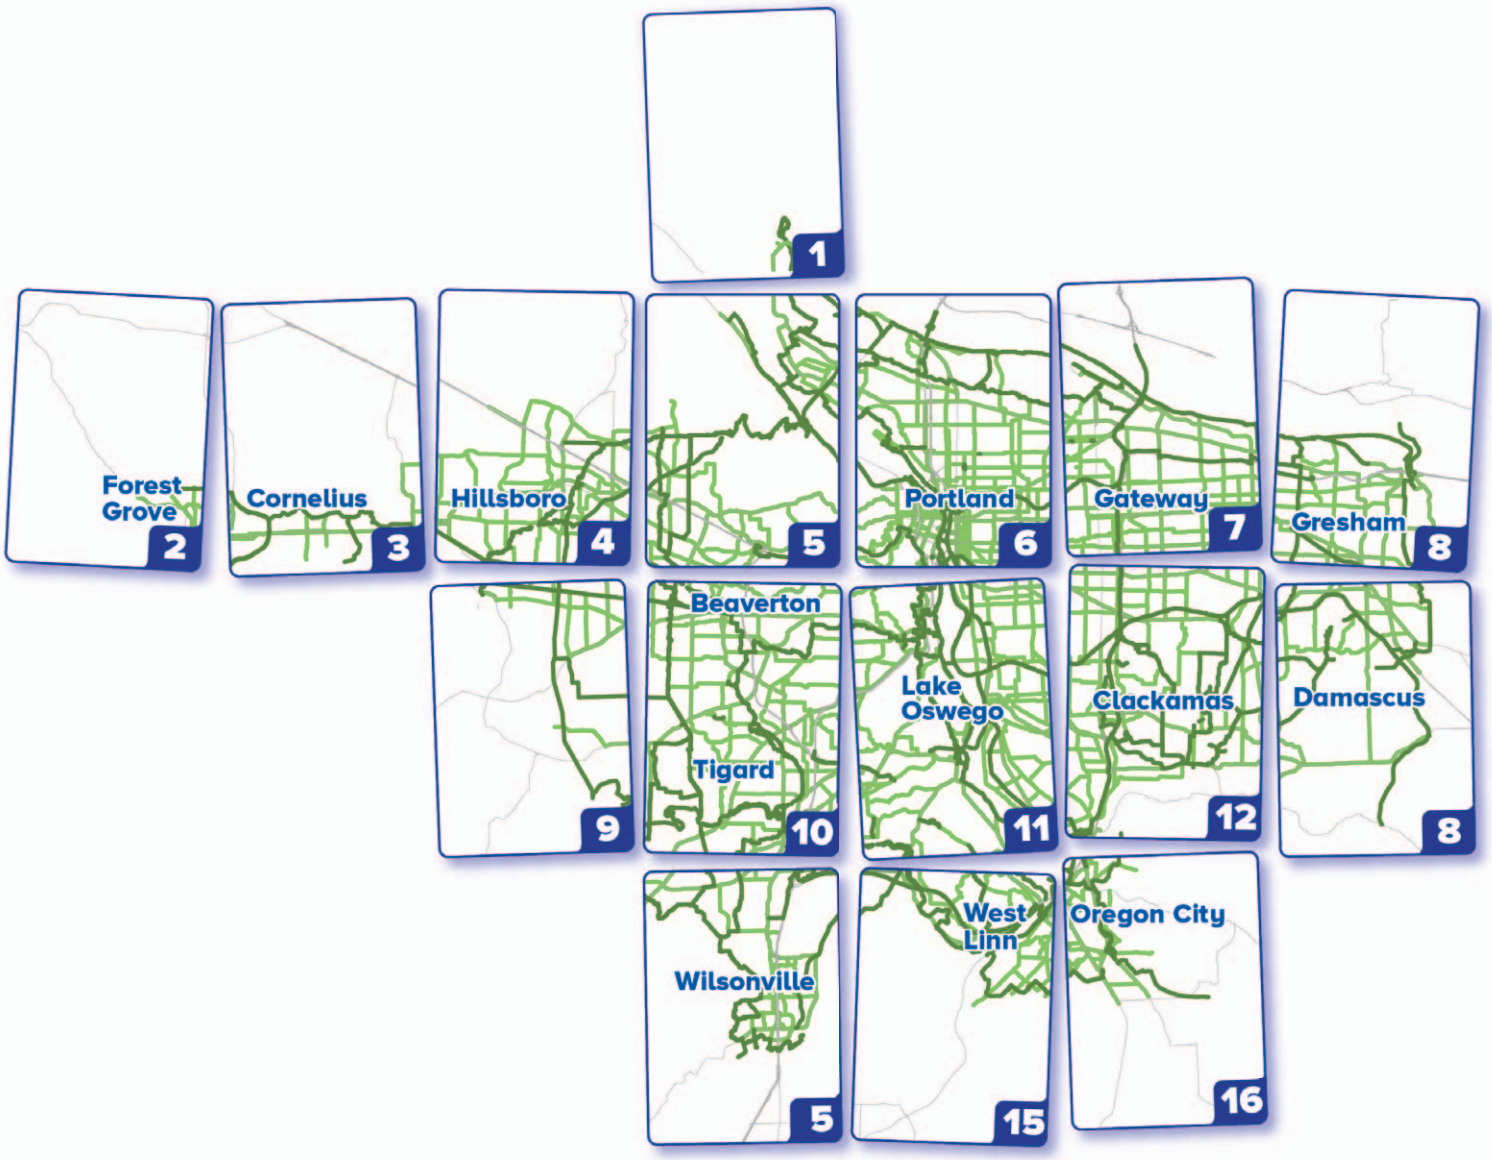
Regional Active Transportation Plan



Bicycle Network MAP BOOK

February 2014

DRAFT

MAKING A GREAT PLACE

Metro

This map book provides details of the draft regional bicycle network identified in the draft Regional Active Transportation Plan.

Bicycle parkway

Regional bicycle parkways are a new functional class for the regional bicycle network and are the highest functional class for bicycle routes. Bicycle parkways make up the spine of the bicycle network. Parkways can be on any type of facility, such as a bicycle lane, cycle track, bicycle boulevard, or trail. Bicycle parkways are spaced approximately every two miles on the regional bicycle network, and connect to and through every urban center, many regional destinations and to most employment and industrial land areas and regional parks and natural areas.

Regional bikeway

Regional bikeways are the second highest functional classification and can be on any type of facility, including off-street trails, separated in-street bikeways (such as buffered bicycle lanes) and bicycle boulevards. Regional bikeways connect to bicycle parkways and complete the regional network of bicycle routes.

Local bikeway

Local bikeways are bikeways that are not part of the regional ATP bicycle network. Local bikeways can be trails, streets and other connectors. Local connections are very important to a fully functioning network providing for door to door bicycle travel.

Bicycle district

Bicycle districts correspond with 2040 Growth Concept Design Types - the Central City, Regional and Town Centers and Station Communities; bicycle and pedestrian districts are the same.A bicycle district is an area with a concentration of transit, commercial, cultural, educational institutional and/or recreational destinations where bicycle travel is intended to be attractive, comfortable and safe. Bicycle districts are also areas with current or planned high levels of bicycle activity.

Bike transit facility

Bicycle transit facilities are often referred to as Bike & Rides and include protected, secure bicycle parking at transit centers. Some can include showers, lockers and bicycle repair.

Oregon City

16

Clean air and clean water do not stop at city limits or county lines. Neither does the need for jobs, a thriving economy, and sustainable transportation and living choices for people and businesses in the region. Voters have asked Metro to help with the challenges and opportunities that affect the 25 cities and three counties in the Portland metropolitan area.

A regional approach simply makes sense when it comes to providing services, operating venues and making decisions about how the region grows. Metro works with communities to support a resilient economy, keep nature close by and respond to a changing climate. Together, we're making a great place, now and for generations to come.

Stay in touch with news, stories and things to do.
