SUSTAINABILITY

- Seafood management and distribution significantly affect the public health, environment, economy and quality of life. It is the policy of the Zoo to promote the health and well-being of its visitors as well as the environment. Metro believes in pursuing sustainable seafood purchases whenever possible. Metro follows the Monterey Bay Aquarium Seafood Watch program and believes in their vision to "help sustain wild, diverse, and healthy ocean ecosystems that will exist long into the future." We do this by encouraging consumers and businesses to purchase seafood that is fished or farmed in ways that do not harm the environment. When there is scientific uncertainty, we err on the side of conservation. See Attachment D, Seafood Watch, Buyer's Guide, for Best Choices and Avoid items, dated June 2013 for details.
- Contractor(s) shall abide by Federal, State, and/or Municipal laws, rules, regulations, and ordinances governing sustainable fishery management.
- Metro looks to Contractors to help us make sustainable choices and be partners in promoting healthy seafood practices by considering fishery, habitat, species, management, and a host of other factors that affect each species.
- In addition, the Zoo is eager to increase the percentage of food and products purchases that helps promote the following sustainable goals.
 - Promote healthy diets and better environmental stewardship;
 - Increase awareness of local residents regarding nutrition, food skills and the source of their food;
 - Take into account the business and economic issues affecting the viability of seafood; and
 - Reduce the environmental impacts associated with food production, transportation, consumption and disposal.With that said the Zoo is interested in Contractors that can help the Zoo achieve these goals and reports that will help us to track our progress. Third party certifications of sustainability and reduced packaging are examples.
- In order to further its commitment to sustainability, the Zoo is interested in purchasing sustainable foods when possible. The Zoo will always discuss, encourage and educate clientele on our sustainable goals. It is our goal to always choose off of the Monterey Bay Aquarium Seafood Watch green list when possible, but Metro may be required to make exceptions. Seafood for human and animal consumption shall be purchased off the green (Best Choices) and yellow (Good Alternatives) sections of the Seafood Watch Buyer's Guide, and seldom off the red (Avoid) section of the list. The Zoo will make the determination at time of order.
