Willamette Narrows and Canemah Bluffs Target Area

Goal

- Acquisition of strategic additions in the Willamette Narrows and Canemah Bluff target area will protect the unique biological, geological and scenic values of this area and allow for a publicly accessible regional natural area to be established.

Objectives

Tier I Objectives

- Acquire property adjacent to existing public holdings that are essential to the establishment and management of a publicly accessible regionally significant natural area.
- Prioritize acquisition of unique landscape forms (kolks, fens, rock outcrops) and rare plant communities (oak woodland, prairie, isolated wetlands).
- Secure protection of remaining gaps in riparian areas on the west bank of the Willamette River between existing public holdings and Peach Cove fen.
- Acquire lands to extend public ownership of forested Bluff and protect scenic views of Canemah Bluff from the river and nearby publicly owned lands.
